COMPUTER PHYSICS COMMUNICATIONS

Abstracted / Indexed in: Chemical Abstracts / Current Contents: Physical, Chemical & Earth Sciences / EI Compendex Plus / Engineering Index / INSPEC

Volume 107, numbers 1–3, December 1997

CONTENTS

Computational physics

Van Hameren, A., R. Kleiss and J. Hoogland
Gaussian limits for discrepancies. I. Asymptotic results 1

Rhodin, A.
IMAS. Integrated Modeling and Analysis System for the solution of optimal control problems 21

Berg, B.A. and J. Riedler
Signal confidence limits from a neural network data analysis 39

Fachat, A. and K.H. Hoffmann
Implementation of Ensemble-Based Simulated Annealing with dynamic load balancing under MPI 49

Natarajan, A. and N. Mohankumar
A note on the numerical evaluation of the *H* function 54

Billeter, S.R. and W.F. van Gunsteren
A modular molecular dynamics / quantum dynamics program for non-adiabatic proton transfers in solution 61

Glück, F. and I. Joó
Hard photon bremsstrahlung effects in hyperon semileptonic decays 92

Omelyan, I.P.
Ewald summation technique for interaction site models of polar fluids 113

Jabbarzadeh, A., J.D. Atkinson and R.I. Tanner
Parallel simulation of shear flow of polymers between structured walls by molecular dynamics simulation on PVM 123

Pullan, W.J.
Genetic operators for the atomic cluster problem 137

Kiviniemi, T.P. and J.A. Heikkinen
Choice of constants of motion coordinates in numerical solving of the three-dimensional Fokker–Planck equation for tokamaks 149

Avdeev, L.V., J. Fleischer, M.Yu. Kalmykov and M.N. Tentyukov
Towards automatic analytic evaluation of diagrams with masses 155

Widmann, A.H. and D.B. Adolf
A comparison of Ewald summation techniques for planar surfaces 167

(Continued inside)

Computer programs in physics

Bockstedte, M., A. Kley, J. Neugebauer and M. Scheffler
Density-functional theory calculations for poly-atomic systems: electronic structure, static and elastic properties and ab initio molecular dynamics 187

Gontchar, I., L.A. Litnevsky and P. Fröbrich
A C-code for combining a Langevin fission dynamics of hot nuclei with a statistical model including evaporation of light particles and giant dipole γ-quanta 223

Gonçalves, M., S.B. Duarte, F. Garcia and O. Rodriguez
PRESCOLD: Calculation of the half-life for alpha decay, cluster radioactivity and cold fission processes 246

Sattin, F.
Lyap: A Fortran 90 program to compute the Lyapunov exponents of a dynamical system from a time series 253

Dyadkin, I.G. and K.G. Hamilton
A family of enhanced Lehmer random number generators, with hyperplane suppression, and direct support for certain physical applications 258

Brücher, L., J. Franzkowski and D. Kreimer
oneloop 2.0 – A program package calculating one-loop integrals 281
